

vTv Therapeutics to Participate in Upcoming Mizuho, Stifel and Piper Jaffray Conferences

11/10/16

HIGH POINT, N.C.--(BUSINESS WIRE)--Nov. 10, 2016-- vTv Therapeutics Inc. (Nasdaq:VTVT), a clinical-stage biopharmaceutical company engaged in the discovery and development of new orally administered treatments for Alzheimer's disease and diabetes, today announced that it will be participating in the following conferences:

- **Global Mizuho Investor Conference (MIC) NY** on Monday, November 14 in New York.
- **Stifel 2016 Healthcare Conference** on Tuesday and Wednesday, November 15-16 in New York. vTv's senior executives will be presenting on Tuesday, November 15, from 4:30-5:10 pm in Winslow on the 5th floor.
- **Piper Jaffray Healthcare Conference** on Tuesday and Wednesday, November 29-30 in New York. vTv's senior executives will be presenting on Wednesday, November 30 from 10:30-10:55 am.

About vTv Therapeutics

vTv Therapeutics Inc. is a clinical-stage biopharmaceutical company engaged in the discovery and development of orally administered small molecule drug candidates to fill significant unmet medical needs. vTv has a pipeline of clinical drug candidates led by programs for the treatment of Alzheimer's disease and type 2 diabetes as well as treatment of inflammatory disorders and the prevention of muscle weakness.

The company's Alzheimer's disease drug candidate, *azeliragon*, is a novel oral small molecule antagonist of the Receptor for Advance Glycation Endproducts (RAGE) with first-in-class potential.

The *azeliragon* development program has been granted Fast Track Designation and agreement on its Phase 3 protocol has been reached with FDA via a Special Protocol Assessment (SPA). Enrollment of part A of the Phase 3 STEADFAST study in patients with mild Alzheimer's disease was completed during the third quarter and topline data from this part of the study is anticipated to be reported in early 2018.

vTv is also pursuing the clinical development of TTP399, a novel liver selective Glucokinase Activator (GKA) with first-in-class potential for the treatment of type 2 diabetes. The company recently announced positive top line results from the six month phase 2b AGATA Study in subjects with type 2 diabetes.

vTv's second diabetes drug candidate, TTP273, is an oral, small molecule GLP-1R agonist with best-in-class potential. The company reported the completion of enrollment of the three month Phase 2 LOGRA study in the third quarter with data readout expected at the end of 2016. The previous Phase 1b trial of TTP273 demonstrated robust effects on postprandial and fasting glucose. All doses of TTP273 were well tolerated with no serious adverse events or evidence of gastrointestinal side effects compared to placebo.

Forward-Looking Statements

This release contains forward-looking statements, which involve risks and uncertainties. These forward-looking statements can be identified by the use of forward-looking terminology, including the terms "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "will," "would" and, in each case, their negative or other various or comparable terminology. All statements other than statements of historical facts contained in this release, including statements regarding the timing of our clinical trials, our strategy, future operations, future financial position, future revenue, projected costs, prospects, plans, objectives of management and expected market growth are forward-looking statements. These statements involve known and unknown risks, uncertainties and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Important factors that could cause our results to vary from expectations include those described under the heading "Risk Factors" in our Annual Report on Form 10-K and our other filings with the SEC. These forward-looking statements reflect our views with respect to future events as of the date of this release and are based on assumptions and subject to risks and uncertainties. Given these uncertainties, you should not place undue reliance on these forward-looking statements. These forward-looking statements represent our estimates and assumptions only as of the date of this release and, except as required by law, we undertake no obligation to update or review publicly any forward-looking statements, whether as a result of new information, future events or otherwise after the date of this release. We anticipate that subsequent events and developments will cause our views to change. Our forward-looking statements do not reflect the potential impact of any future acquisitions, merger, dispositions, joint ventures or investments we may undertake. We qualify all of our forward-looking statements by these cautionary statements.
